Mahidol University opens VentureClub@MUSC

Supporting startup culture with research and innovation

VentureClub@MUSC, the new innovative learning support centre created by the Faculty of Science, Mahidol University, presents a promising gateway for startups to forge their way in the business world. The programme is designed to support research-based innovations created by young-blood business owners and investors in all commercial sectors, so they can gain knowledge, enjoy increased opportunities, and achieve business goals.

Prof. Banchong Mahaisavariya, M.D. Acting President, Mahidol University, revealed that the centre is one of Mahidol University's strategies aimed at supporting the national policy to drive the sufficiency economy philosophy to Thailand 4.0 by focusing on the value-based economy which relies on technology and innovation to move business forward.

VentureClub@MUSC was established in 2018 with a commitment to create a resource of people who are competent in science and technology. Its programmes focus on research and scientific innovation, academic services and knowledge transfer, so as to increase profits and develop communities, society, and the country in sustainable ways.

VentureClub@MUSC is located at the Phayathai campus, Faculty of Science, Mahidol University. Applicants are able to launch pilot programmes to explore business

potential and seek new opportunities.

VentureClub@MUSC also represents a hub providing research by students and giving professional advice to support business networks. This, in turn, will develop and generate commercial benefits, stated Assoc. Prof. Sittiwat Lertsiri, Dean of the Faculty of Science, Mahidol University.

In addition to the startup support programmes, the Faculty of Science, Mahidol University, has introduced six international undergraduate programmes coordinated as 2+2 or double degrees, and has extended postgraduate programmes in conjunction with overseas universities, thereby providing and strengthening the foundations for new generations.

The programmes provide unique opportunities for students

to combine courses from more than one school, creating an interdisciplinary academic experience. The students can also pursue additional academic interests along with their undergraduate degrees.

The combination courses grant students opportunities to discover their true interests and expand the scope of their knowledge to meet future challenges.

The programmes are not limited to Thai citizens. Foreigners who are interested in the courses and training are also eligible.

Graduates will be provided with transcripts valid for 5 years and a certificate entitling them to transfer to any graduate school.

To apply please contact +66 (0) 2441 9820 ext. 1199 or VentureClub@MUSC +66 (0) 2201 5728-9. For more details science.mahidol.ac.th/ventureclub
